SUMMARY

Recent BCA graduate currently pursuing an MCA at SRM Institute of Science and Technology(online), with hands-on exposure across full-stack development, data analytics, and cloud infrastructure gained through academic projects, internship, and training. Comfortable working across Python, SQL/Oracle, React.js, FastAPI, and Power BI environments, with a strong problem-solving mindset and the ability to pick up new tools quickly. Seeking an entry-level opportunity to apply and grow these skills in a real-world setting.

EDUCATION

Master of Computer Applications (MCA) (online) — SRM Institute of Science and Technology, Chennai 2026 – Present
Bachelor of Computer Application (BCA) — Bishop Heber College, Tiruchirappalli 2023 – 2026

SKILLS

Programming: Python, Java, JavaScript, HTML5, CSS3, React.js

Backend & APIs: Node.js, FastAPI, REST APIs, SQLAlchemy, JWT Authentication

Databases: Oracle Database, PL/SQL, SQL, PostgreSQL (Neon)

Data Analytics & BI: Power BI, Excel, Pandas, NumPy, Matplotlib, Data Visualization

Cloud: Microsoft Azure, AWS

Tools / OS: Git, GitHub, Linux, VS Code, Oracle SQL Developer

WORK EXPERIENCE

VDart Technologies Pvt. Ltd, Tiruchirappalli — Cloud Computing Intern Aug 2025 – Sep 2025

- Completed internship in Cloud Computing with hands-on exposure to Microsoft Azure Analytics Services
- Learned Azure cloud fundamentals, server resource management, and basic cloud infrastructure operations

TRAINING

Best of Breed Software Solutions India Pvt. Ltd, Bengaluru — Finacle Core Banking Training May 2026 – Jul 2026

- Worked with Linux/Unix commands for system navigation, file management, and process monitoring
- Operated Oracle Database and executed SQL/PL-SQL scripts in a Linux-based server environment
- Gained exposure to core banking workflows using Infosys Finacle

PROJECTS

VertexOps – Enterprise IT Ticket Management System (React.js, FastAPI, Python, PostgreSQL, Oracle Database, SQLAlchemy, JWT, REST APIs, Vercel, Render)

- Developed a production-ready IT ticket management system with JWT authentication, role-based access control, and full ticket lifecycle management
- Built a React.js frontend and FastAPI REST APIs, integrating PostgreSQL and Oracle Database via SQLAlchemy, deployed on Vercel and Render

FMCG Demand Forecasting & Stockout Risk Analytics (Python, Oracle SQL, Excel, Power BI)

- Built an end-to-end analytics pipeline on 1,000+ sales records, including data extraction and transformation in Oracle SQL, demand forecasting in Python, and an interactive Power BI dashboard to flag stockout risk and support inventory decisions

Retail Sales Dashboard (Power BI)

- Built a 3-page interactive dashboard using Power Query, DAX measures, KPI cards, and synced slicers to track sales, customer, and product performance

IoT-Based Smart Agriculture and Automated Irrigation System

- Built an automated irrigation system using IoT sensors and C programming for real-time soil-moisture and rainfall-based control

CERTIFICATIONS

- Infosys Springboard: Fundamentals of Data Analytics, Microsoft Excel for Data Analyst, Microsoft Power BI, Java Essentials
- AWS Academy: Cloud Foundations
